Bacterial Filtration Efficiency (BFE) and Differential Pressure (Delta P) Final Report

Test Article: Medcross medical mask (3 layers)
Colour: Blue
Purchase Order: N-CL-EN-01
Study Number: 1294774-S01
Study Received Date: 01 May 2020
Testing Facility: Nelson Laboratories, LLC
6280 S. Redwood Rd.
Salt Lake City, UT 84123 U.S.A.
Test Procedure(s): Standard Test Protocol (STP) Number: STP0004 Rev 18
Deviation(s): None

Summary: The BFE test is performed to determine the filtration efficiency of test articles by comparing the bacterial control counts upstream of the test article to the bacterial counts downstream. A suspension of Staphylococcus aureus was aerosolized using a nebulizer and delivered to the test article at a constant flow rate and fixed air pressure. The challenge delivery was maintained at 1.7 - 3.0 x 10^3 colony forming units (CFU) with a mean particle size (MPS) of 3.0 ± 0.3 μm. The aerosols were drawn through a six-stage, viable particle, Andersen sampler for collection. This test method complies with ASTM F2101-19 and EN 14683:2019, Annex B.

The Delta P test is performed to determine the breathability of test articles by measuring the differential air pressure on either side of the test article using a manometer, at a constant flow rate. The Delta P test complies with EN 14683:2019, Annex C and ASTM F2100-19.

All test method acceptance criteria were met. Testing was performed in compliance with US FDA good manufacturing practice (GMP) regulations 21 CFR Parts 210, 211 and 820.

Test Side: Inside
BFE Test Area: ~40 cm^2
BFE Flow Rate: 28.3 Liters per minute (L/min)
Delta P Flow Rate: 8 L/min
Conditioning Parameters: 85 ± 5% relative humidity (RH) and 21 ± 5°C for a minimum of 4 hours
Test Article Dimensions: ~173 mm x ~162 mm
Positive Control Average: 2.3 x 10^2 CFU
Negative Monitor Count: <1 CFU
MPS: 2.8 μm

The filtration efficiency percentages were calculated using the following equation:

\[
\% BFE = \frac{C - T}{C} \times 100
\]

- \( C \) = Positive control average
- \( T \) = Plate count total recovered downstream of the test article

Note: The plate count total is available upon request.
